ASCFS / ASMS BOOT CAMP*

Essential Training for Craniofacial Fellows

* formerly the Basic Techniques of Craniofacial Surgery

August 8-10, 2014

Barrows Neurological Institute
St. Joseph's Hospital Medical Center
Phoenix, Arizona

Craniofacial Surgery is a sub-specialty of plastic surgery. It traces its roots to a group of surgeons who were interested in the treatment of birth defects in children involving the skull and face. In the late 1960s, Dr. Paul Tessier from Paris, France reported on techniques he has developed to treat children with rare birth defects. Following these initial reports, many surgeons from around the world traveled to Paris to learn these new procedures. Building on these beginnings, and the contributions of other surgeons, the field of craniofacial surgery was born. Today, new and refined craniofacial techniques are used, not only to treat birth defects in children, but also to help neurosurgeons resect tumors that were previously believed to be unresectable, help reconstruct the face and skull following trauma, and even expand the scope of aesthetic surgery.

Course Objective and Description:

The course is designed to teach new craniofacial fellows the basic major craniofacial osteotomies so they can practice craniofacial surgery safely and successfully. The setting will be both didactic lecture and cadaver lab dissection.

Sponsored:

American Society of Craniofacial Surgery
American Society of Maxillofacial Surgeons
With an unrestricted educational grant from KLS Martin

DISTINGUISHED FACULTY

Co Chairs:

Joseph Losee, MD, ASCFS President, ASMS Assistant Secretary
Kant Lin, MD, ASCFS Past President, ASMS President-Elect

Faculty:

Scott Bartlett, MD
Stephen Beals, MD
Reza Jarrahy, MD
John Polley, MD
Mark Urata, MD

Requirements:

The course is open only to Fellows in a current, recognized Craniofacial and Maxillofacial Fellowship Program in North America.

Registration and Fees

There is no registration fee for fellows to attend.

Please register online at www.ascfs.org or complete the attached registration form and return to ASCFS Office, Fax: 978-524-8890.

Travel and hotel expenses should be covered by your Fellowship Program.

PRELIMINARY PROGRAM

FRIDAY, AUGUST 8, 2014

6:45 am	Hilton Lobby - Shuttle to BNI
7:00 – 8:00	<i>Check-in and Breakfast</i>
8:00 – 10:00	Module 1 - Cranial Remodeling
	8:00 – 8:30 Lecture – Kant Lin, MD
	8:30– 10:00 Cadaver Lab
10:00 – 10:15	<i>Coffee Break</i>
10:15 – 12:15	Module 2 - LeFort III/Monobloc
	10:15 – 10:45 Lecture – Mark Urata, MD
	10:45 – 12:15 Cadaver Lab
12:15 – 1:00	<i>Lunch</i>
1:00 – 3:00	Module 3 - Hypertelorism/Facial Bipartition/Transnasal Wiring
	1:00 – 1:30 Lecture – Scott Bartlett, MD
	1:30 – 3:00 Cadaver Lab
3:00 – 5:15	Module 4 - Transfacial Approaches to Skull Base
	3:00 – 3:30 Lecture – Stephen Beals, MD
	3:30 – 5:00 Cadaver Lab
	Prosecution demonstration, Levels I – V; Dissection, Levels VI, VII
5:00 – 6:30	Module 5 - TMJ Primer
	5:00 – 5:30 Lecture – Stephen Beals, MD
	5:30 – 6:30 Cadaver Lab
7:00 pm	Welcome Reception Mexican Fiesta at Hilton Suites Atrium

SATURDAY, AUGUST 9, 2014

7:15 am	Hilton Lobby - Shuttle to BNI
7:30 – 8:00	<i>Breakfast</i>
8:00 – 9:30	Module 6 - LeFort I
	8:00 – 8:30 Lecture – Reza Jarrahy, MD
	8:30 – 9:30 Cadaver Lab
9:30 – 11:30	Module 7 - Mandibular Osteotomy / Genioplasty
	9:30 – 10:00 Lecture – Reza Jarrahy, MD
	10:00 – 11:30 Cadaver Lab
11:30 – 12:30	<i>Lunch</i>
12:30 – 2:00	Module 8- Virtual Surgical Planning
	12:00 – 1:00 Lecture – John Polley, MD
	1:00 – 2:00 Cadaver Lab
2:00 – 4:00	Module 9 - Application of Distraction Devices
	2:00 – 2:30 Lecture – Scott Bartlett, MD
	2:30 – 4:00 Cadaver Lab
4:00 – 5:15	Module 10 - Dental Implants
	4:00 – 4:30 Lecture – Mark Urata, MD
	4:30 – 5:15 Cadaver Lab
7:30	Hilton Suites Lobby for Shuttle to Dinner
8:00	Fogo de Chao, Brazilian Steak House, Scottsdale

SUNDAY, AUGUST 10, 2014 – Departure
